2.

The Akademie Institut of Biology and Medicine is a very well equipped cancer research institute. Dr. FRIEDRICH is the chief of the Institute, and is a very good man, except he is reaching old age and is incapable of doing ~~topnotch~~ work any more. The Biophysics Department under Mr. DORNBERGER is one of the departments at the Institute. It is concerned with ultra-violet research and is not properly staffed. Another department is that of ~~ultrasonics~~ and is concerned with the calibration of all East Zone equipment used for measuring x-ray doses. Still another department is concerned with x-ray scattering and is under the leadership of a Miss DORNBERGER. The new Neutron Department will be under her jurisdiction also, once it is established. They

presently have a 5,000 volt betatron for it. The parts for this neutron generator came

from an unknown [redacted] The Institute has two buildings, one of which is the old Kaiser Wilhelm Institut fuer Hirnforschung. The second building is an old one story structure which has had a second story recently added to it and which serves as a cancer research clinic. It is very well equipped with new equipment recently received from [redacted]

25X1

The new neutron building is to be located adjacent to the old buildings, which are on Leonberger Strasse, Berlin Buch, approximately 100 meters from the blockade which separates East Berlin from the East Zone of Germany.
